Information Seeking And Subject Representation: An Activity-theoretical Approach To Information Science

Birger Hjorland

interesting notes about pragmatism in librarianship see also: B. Hjørland, Information Seeking and Subject Representation: An Activity-Theoretical Approach

Information seeking is the fundamental problem in information science. Thus, information seeking is the fundamental problem in information science. Perspectives on information seeking, retrieval and knowledge formation in. approaches to information behaviour were inspired by natural scientific ideas of 1997, Sundin, Olof. Journal of the American Sociaty for Information Science and Technology 54 2003. Inside the Search Process: Information Seeking from the Users Perspective. and Subject Representation: an Activity-Theoretical Approach to Information

information seeking and subject representation: an activity. The work then analyzes information seeking as a methodologically collectivistic activity. The volume begins with an examination of subject representation and retrieval. Thus, information seeking is the fundamental problem in information science, while other problems, such as document representation, are subordinate. *Free Information Seeking and Subject Representation Activity. The title is Information seeking and subject representation: An activity-theoretical approach to information science. This book presellts a new general theoFY for “isms” in information science: constructivism. - CiteSeerX
