Glenmore Reservoir storage during a low flow period in the 2yr Min scenario, in 2033.
seasonal variability Rood et al., 2008 Forbes et al., 2011 Kienzle et al.,
2011. The Bow River is a river in the Canadian province of Alberta. It begins in the Rocky Mountains. In its
operations, Calgary Power relied upon estimates of the rivers minimum flow during winter conditions.
Greater changes in attitude toward the river were manifest in the Bow River Water Quality Councils reports over time.
